Paula, We go way back to the early days. I want to thank you for all that you have done, over the years you have support any request and efforts regardless of how weird they may have sounded. Your ability to understand our needs when the words we were communicating wasn't necessarily getting the message across simply but understanding our process and goals has been invaluable. The quickness of your responses cannot be understated. Thank you for all you have done, I want to wish you well on whatever is next for you.
